

Agentic Retail Automation Platform

Unify intelligence, governance, and automation across pricing, supply chain, merchandising, and store operations with enterprise-grade AI Agents, secure, explainable, and built for real-time retail performance and scale.

Key Features

Transform retail workflows with governed, explainable AI built for agility and performance.

Build, deploy, and manage retail-specific AI Agents using configurable (no-code/low-code) workflows.

Orchestrate multiple specialized agents to execute complex, multi-step retail workflows across pricing, planning, and supply chain.

Ground agent decisions in enterprise retail data from POS, ERP, and connected systems using retail-native LLMs.

Ensure agent actions remain secure, compliant, and auditable with enterprise-grade governance and human-in-the-loop controls.

Scale agent deployments securely with built-in Responsible AI guardrails that enforce compliance and control.

The Agentic Ecosystem

Interconnected AI Agents transforming every retail function with intelligence and automation.

Analytics & Merchandising

Drive precision in pricing, planning, and assortment decisions.

Automation, Compliance & Operations

Ensure accuracy, compliance, and efficiency across operations.

Marketing & Revenue Growth

Accelerate revenue with data-driven targeting and dynamic pricing.

Customer Experience & Employee Enablement

Empower teams and shoppers with personalized, intelligent assistants.

Business Processes & Productivity

Streamline enterprise workflows with autonomous, data-grounded actions.

About Impact Analytics

Impact Analytics delivers AI-native SaaS solutions and consulting services that help companies maximize profitability and customer satisfaction through deeper data insights and predictive analytics leveraging Agentic AI. Our end-to-end platform for planning, forecasting, merchandising, pricing, and promotions powers smarter, real-time decisions across retail, grocery, QSRs, CPG and manufacturing. Impact Analytics empowers companies to make smarter decisions based on real-time insights, rather than relying on last year's inputs to forecast and plan this year's business.
